

Measuring Justice

Statistics and Indicators in Criminal Justice and Counter-Terrorism

WEDNESDAY
4 November 2026

TIME
3:30–5:00 pm CET

WHERE
**Warsaw and Microsoft
Teams**

How do numbers shape justice and security?

Statistics increasingly guide criminal justice and counter-terrorism: they help identify trends, assess risks, allocate resources and evaluate policy. This seminar explores how data can support evidence-based decisions and accountability, while asking how categories and indicators shape institutional priorities. The discussion will also consider selective measurement, distorted incentives and the risks of relying too heavily on quantitative metrics.

SPEAKERS

Dr Elena Piñeros Polo

Permanent Lecturer, Rey Juan Carlos University

Research and teaching in criminal justice, procedural law, international courts and tribunals, arbitration and international litigation.

Dr Berta Alam-Pérez

Assistant Professor, Rey Juan Carlos University

Research on terrorism and counter-terrorism, including Lebanon and Hezbollah, use of force, armed conflict, human rights and the Special Tribunal for Lebanon.

MODERATOR

Dr Andrzej Jakubowski Head of the Centre for Cultural Heritage Law and Sustainable Development, Institute of Law Studies, Polish Academy of Sciences.
